

IN THE CLAIMS:

Please cancel Claims 1-10 without prejudice.

Please amend Claim 11 as follows:

Sub B3

AB

11. (once amended) A fusion polypeptide comprising from the 5' end:

- an amino acid sequence encoding a signal peptide functional in Aspergillus;
- an amino acid sequence encoding a secreted polypeptide or portion thereof normally secreted from Aspergillus;
- optionally an amino acid sequence encoding a cleavable linker; and
- an amino acid sequence encoding a [desired] glycosyltransferase having a deletion of the transmembrane anchor region.

REMARKS

This application is a continuation application of priority application USSN 08/443,954 filed May 18, 1995 in which original claims 1-18 were subject to a restriction requirement. In the instant amendment, Claims 1-10 are canceled without prejudice. Applicants reserve the right to file divisional applications to the withdrawn subject matter. An extension in time of three months up to and including April 20, 1998 has been filed in priority application USSN 08/443,954 in order to establish co-pendency.

Support for the amendment to Claim 11 can be found in the specification at page 12, second full paragraph; page 18, Example I; and page 30, Example 8.

Applicants submit that no new matter has been added by these amendments to the claims. Applicants request that the preliminary amendment be taken into account when calculating the application filing fee.
